Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I: a converted action is a cancel operation (an example of this situation is in claim 102).
- Species II: a converted action is inhibited (an example of this situation is in claim 103).
- Species III: a process lacks a custom code (an example of this situation is in claims 6, 8).
- Species IV: a process includes a custom code (an example of this situation is in claims 7, 9).

• Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

• 2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Art Unit: 3625

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverses on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
